Continuation of Substance of Interview including description of the general nature of what was discussed: On 4/9/07 the examiner informed Ms. Hess that a printer query is present in the case. The printer pointed to many pages of the specification in which the last 1 or 2 lines have been compressed or partly cut off. Ms. Hess responded that she will try to obtain a clean copy of the specification. As of 4/12/07 no new specification had been submitted. The examiner contacted Office of Publications and indicated that the corresponding US Patent publication, US 2005/0250760 A1 was completely legible. The missing text was provided to them. Ms. Hess did fax a substitute specification to the examiner on 4/20 via fax but this copy has the top pages cut off in some instances and in others the data on the bottom is still illegible in places. Thus the specification will be scanned in the file but not entered. The Office will rely on the Patent Pub for the needed text..
